Clinician:

History:
Clinical findings/results/medications:

Temperament:
HR: RR:
Pulse quality:
MM: CRT:
Thoracic auscultation:
Temperature: °C

ASA classification
I No organic disease
II Mild systemic disease
III Severe systemic disease (not incapacitating)
IV Severe disease (constant threat to life)
V Moribund (life expectancy < 24 h)
Add 'E' for emergencies
ASA Grade:

Procedure(s):

Anticipated problems:

Pre-GA medication	Dose	Route	Time
.....
.....
.....

Anaesthetic Safety Checklist completed <input type="checkbox"/>

Induction agent(s)	Dose	Route	Time
.....
.....
.....

IV catheter Position: Size:

ET tube / LMA / Mask Size:
Cuffed / Uncuffed

Eye(s) lubricated <input type="checkbox"/>
--

Breathing system:	Patient position:
	Patient warming:

Anaesthesia monitoring record overleaf

RECOVERY concerns & instructions:

Temperature: °C
Extubation time:

IV catheter care	<input type="checkbox"/> Remove once recovered
	<input type="checkbox"/> Maintain & flush

Post-op fluid therapy

Post-op analgesia

Other post-op care

<input type="checkbox"/> Relevant information transferred to kennel sheet / patient record
